DOWNTOWN ENTERPRISE

ENTERPRISE, ALABAMA

MARKET SNAPSHOT

Main Street Enterprise and community partners are taking a pro-active approach to planning for the future prosperity of Downtown Enterprise. Ongoing efforts are serving to heighten the appeal of Downtown Enterprise as a place to work, visit, live, do business, and invest. A holistic approach to revitalization is sparking a new wave of activity and positioning Downtown Enterprise as a local and regional attraction, economic engine, and center for commerce.

This Market Snapshot, commissioned by Main Street Alabama, summarizes local and regional demographic, lifestyle, and retail data. The information provides a starting point for evaluating the market, identifying potential opportunities, and assessing Main Street Enterprise enhancement strategies; and for benchmarking and tracking changes in the market and possible implications for Downtown Enterprise.

**Main Street Enterprise** ☏ (334) 347-1211 🖱 enterprisedowntown.com

Enterprise is a Main Street Alabama community.

Main Street Alabama is focused on bringing jobs, dollars and people back to Alabama's historic communities. Economic development is at the heart of this statewide organization's efforts to revitalize downtowns and neighborhoods across the state.

LIFESTYLE PROFILE | Source: Esri 2022

Esri's Community Tapestry is a geodemographic segmentation system that integrates consumer traits with residential characteristics to identify markets and classify U.S. neighborhoods. Tapestry Segmentation combines the "who" of lifestyle demography with the "where" of local geography to create a classification with 67 distinct behavioral market segments (Tapestry Segments), each belonging to one of fourteen LifeMode Groups.

PREVALENT ESRI TAPESTRY LIFEMODE GROUPS

Tapestry LifeMode groups represent markets that share a common experience—born in the same generation or immigration from another country—or a significant demographic trait, like affluence. The GenXurban and Rustic Outposts LifeMode Groups are among those most prevalent in the drive time areas.

GENXURBAN [LM5] | #1 in 10 Minute Drive Time

5 Minutes		10 Minutes		20 Minutes	
HHs	Percent	HHs	Percent	HHs	Percent
915	25.4%	2,910	23.0%	2,910	13.0%

- ▶ Gen X in middle age; families with fewer kids and a mortgage.
- ▶ Second-largest Tapestry group, composed of Gen X married couples, and a growing population of retirees.
- ▶ About a fifth of residents are 65 or older; about a fourth of households have retirement income.
- ▶ Own older single-family homes in urban areas, with 1 or 2 vehicles.
- ▶ Live and work in the same county, creating shorter commute times.
- ▶ Invest wisely, well insured, comfortable banking online or in person.
- ▶ News enthusiasts (read a daily newspaper, watch news on TV, and go online for news).
- ▶ Enjoy reading, renting movies, playing board games and cards, doing crossword puzzles, going to museums and rock concerts, dining out, and walking for exercise.

RUSTIC OUTPOSTS [LM10] | #1 in 20 Minute Drive Time

5 Minutes		10 Minutes		20 Minutes	
HHs	Percent	HHs	Percent	HHs	Percent
133	3.7%	1,331	10.5%	5,873	26.2%

- ▶ Country life with older families in older homes.
- ▶ Depend on manufacturing, retail, and healthcare, with pockets of mining and agricultural jobs.
- ▶ Low labor force participation in skilled and service occupations.
- ▶ Own affordable, older single-family or mobile homes; vehicle ownership is a must.
- ▶ Residents live within their means, shop at discount stores, and maintain their own vehicles (purchased used) and homes.
- ▶ Outdoor enthusiasts, who grow their own vegetables, love their pets, and enjoy hunting and fishing.
- ▶ Pay bills in person; use the yellow pages; read newspapers, magazines, and mail-order books.

Information on Esri Tapestry methodology and applications, along with descriptions for Tapestry's 67 segments, are available from the Esri website at:

RETAIL VIEW | SOURCE: CLARITAS 2022

The Claritas Retail Market Power (RMP) 2022 Retail Stores Opportunity Gap report provides a direct comparison between retail sales and consumer spending by industry. To capture a snapshot of an area's retail market performance, estimates of sales by businesses (supply) are compared to estimates of consumer spending (potential sales or demand) from households in the same area. The difference between estimated actual sales (supply) and potential sales (demand) is expressed as sales surplus or leakage.

DOWNTOWN ENTERPRISE | DRIVE TIME MARKET

SALES SURPLUS AND LEAKAGE ESTIMATES | ($MM)

Total Retail Trade (NAICS 44 – 45)	5 Minutes	10 Minutes	20 Minutes
- Est. Sales (Supply)	$350.3M	$649.2M	$897M
- Potential Sales (Demand)	$111.3M	$361.7M	$840.2M
- Est. Surplus/(Leakage)	$238.9M	$287.4M	$56.8M
Total Food and Drink (NAICS 722)	5 Minutes	10 Minutes	20 Minutes
- Est. Sales (Supply)	$32.5M	$59.5M	$83.9M
- Potential Sales (Demand)	$12.0M	$40.1M	$93.2M
- Est. Surplus/(Leakage)	$20.5M	$19.4M	($9.2M)
Total Retail, Food and Drink (NAICS 44 – 45, 722)	5 Minutes	10 Minutes	20 Minutes
- Est. Sales (Supply)	$382.8M	$708.7M	$980.9M
- Potential Sales (Demand)	$123.3M	$401.8M	$933.3M
- Est. Surplus/(Leakage)	$259.5M	$306.9M	$47.6M

Estimates shown in millions and rounded to nearest one hundred thousand dollars.

Retailers and real estate analysts use Claritas RMP data to understand the difference between supply and demand in existing and potential new trade areas. In areas where demand exceeds supply, an opportunity gap—or leakage—exists that can attract new retail operations or inform what changes need to be made to a store's product mix to increase market share. In areas where supply exceeds demand, a surplus exists, which can signal that the area is attractive to retailers and might offer opportunities for complementary or niche establishments that could capitalize on existing retail clusters and consumer patterns.

Source: Claritas Market Power® 2022 | Retail Stores Opportunity Gap.

Data Note: The polarity of surplus/leakage estimates and sales gap factors shown in this document (as compared to those shown in source Claritas reports) have been reversed to show surplus as a positive value, and to show leakage as a negative value. The Retail Gap (Sales Surplus/Leakage) represents the difference between Retail Potential (Demand) and Retail Sales (Supply). A positive value represents a surplus in sales, often indicating a market where sales are being captured from customers residing outside the defined area.

RMP focuses on Retail Trade NAICS codes 44 and 45, as well as the Food Services industry NAICS code 722. Once national and county level CRT tables are retrieved from the U.S. Census Bureau, all establishments are coded using 2012 North American Industrial Classification System (NAICS) codes to match the data source. The 2012 NAICS codes are then matched with the latest release of NAICS codes from 2017 to reflect any changes in codes.

TOTAL SALES

[Retail Trade (NAICS 44—45) + Food & Drink (NAICS 722)] | Source: Claritas 2022

$382 MILLION 5 MINUTES	$709 MILLION 10 MINUTES	$981 MILLION 20 MINUTES

PERFORMANCE BY CATEGORY

Sales gap factors, sometimes referred to as "pull factors," offer a quick-look means of assessing the relative strength of retail and food and drink categories for a defined area. The factor is a measure of the relationship between supply and demand that ranges from +100 (total surplus) to -100 (total leakage).

A positive value represents a surplus of retail sales and can be indicative of a market where customers are pulled and sales are being captured from consumers residing outside the defined area. Categories with the highest surplus factors might signal opportunities for expansion or tactics to build on market strengths or niches, while categories with negative factors might offer an indication of gaps in the business mix and possibilities for re-positioning, expansion, or recruitment.

SALES GAP FACTORS | DOWNTOWN ENTERPRISE DRIVE TIMES

Category—Factor	5 Minutes	10 Minutes	20 Minutes
Motor Vehicle and Parts Dealers	58.7	46.0	21.5
Furniture and Home Furnishings Stores	74.7	52.3	28.2

Limitations and Disclaimers

Retail market analyses, their components (such as retail sales gap analyses) and derivative business development plans provide important guidance on how a commercial area should, theoretically, be able to perform and on the sales levels businesses should be able to achieve. However, many factors affect the actual performance of businesses and commercial areas, including the skills of the business operator, level of business capitalization, the quality of the physical environment, changes in overall economic conditions, the effectiveness of business and district marketing programs, and other variables. The information in this document is intended to provide a foundation of information for making business development decisions, but it does not and cannot ensure business success.

As is true of all demographic, economic and market studies, our analysis' reliability is limited to the reliability and quality of the data available. Our research assumes that all data made available by and procured from federal, state, city, primary and third party sources is accurate and reliable.

Because market conditions change rapidly and sometimes without warning, the information and opinions expressed here represent a snapshot in time and cannot predict or gauge future changes or results.
